PROFILE

I am a developer dedicated to providing excellent work, critically thought-out solutions and a disciplined, methodical approach to any organization. I enjoy collaborating with my peers on challenging problems, providing peer mentorship and am looking for an environment where I can learn and push myself daily.

SKILLS

React | AngularJS | Javascript | CSS/HTML | MongoDB | Express | NodeJS | Git | Python | jQuery

PROJECTS

TimeShare - Web application using React with MongoDB, NodeJS, Express and Firebase authentication
epikEats - Web application using Express, NodeJS and MongoDB to create and rate a menu
Vacation Tracker - Created personal Express API with REST-ful routes
geoQuakes - Earthquake tracking app using jQuery and Google Maps API
